

Not sorry for putting me first!

- Celi, 23

I love my choices to stay HIV-negative!
I know the facts and I use either oral PrEP, the ring or get the PrEP injection. I choose condoms, testing for HIV and other STIs. I put my health first because self-love is a vibe! And if life happens... I take PEP after an exposure to HIV.

**PrEP ♥ IS
CHOICE**

I live by choice,
NOT BY CHANCE!

- Nhlamulo, 22

HIV prevention is all about putting my health first! I know the straight-up facts about HIV and PrEP. I choose the method that works for me... pill, ring or injection... my choice! I use condoms when I can, test for HIV and other STIs. I don't apologize for taking control of my health.
